

# Carelite App Report

## Issues & Suggestions:

1. There is no possibility to modify the national id, and a message must be shown to alert the user to verify the validity of the national number in registration because it is not possible to modify.
2. Modifying the package name for the customer in the main account section in the dashboard from silver plan to gold plan, and for each, the modification has not been made in the application.
3. Edit phone number in app but don't change in dashboard.
4. the filter in provider services sections should work based on price or category.
5. the filter should be selected by default your location to whom is registered in the account.
6. The notifications center must show notify when there are messages.
7. credit or debit card information is not saved.
8. the profile photo doesn't upload in main account in dashboard and if uploaded profile photo in main account in dashboard don't upload in the app
9. in sign-up page the phone number accept wrong number inside Egypt like (010,011,012,015)
10. customer don't received message from admin

# Carelite provider App Report
